Sir:

Transmitted herewith is a response to an office action in the subject application.

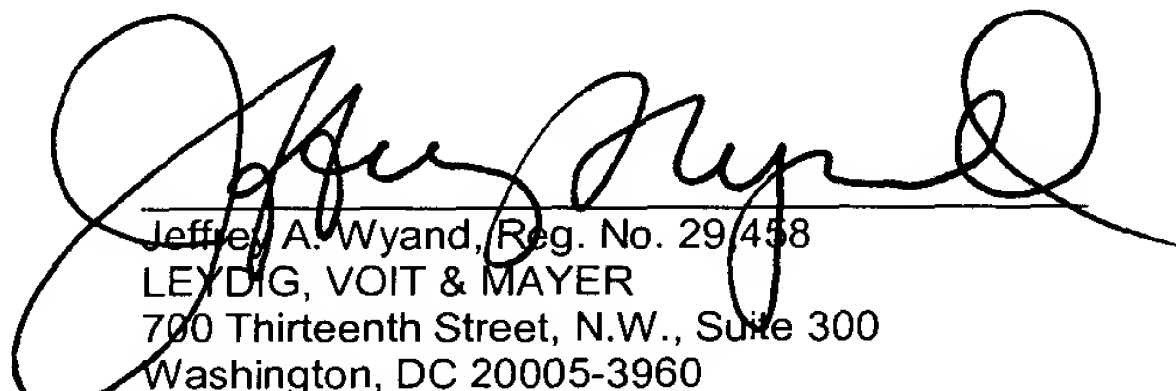

- ☐ Applicants claim small entity status of this application under 37 CFR 1.27.
- ☒ Petition for Extension of Time
- ☒ Applicants petition for a two-month extension of time under 37 CFR 1.136, the fee for which is \$400.00 (enclosed).
- ☐ Applicants believe that no petition for an extension of time is necessary. However, to the extent that such petition is deemed necessary, Applicants hereby petition for a sufficient extension of time to render the present submission timely. Please charge Deposit Account No. 12-1216 for the appropriate petition fee.
- ☒ No additional claim fee is required.
- ☒ Other: Information Disclosure Statement.

The claim fee has been calculated as shown below:

RESPONSE TO OFFICE ACTION

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

In response to the Office Action dated March 29, 2002, please enter the following amendments and consider the following remarks.

AMENDMENTS

IN THE SPECIFICATION:

Replace the paragraph beginning at page 4, line 32 with:

Fig. 1 shows a circuit configuration of a high frequency power amplifier as a First Embodiment of the present invention. In Fig. 1, reference numeral 1 denotes a transistor, 2 denotes a first signal line (line length: L1, line width: W1), 3 denotes a second signal line (line length: L2, line width: W2), 4 denotes a third signal line (line length: L3, line width: W3), 5 denotes a fourth signal line (line length: L4, line width: W4), 6 denotes a fifth signal line (line length: L5, line width: W5), 7 denotes an output-side matching circuit, 8 denotes a signal input terminal, and 9 denotes a signal output terminal. If impedance is not matched in the middle or ends of signal lines 2-6 or the like, a part of the incident wave is reflected. The ratio of this reflected wave to the incident wave is called a reflection coefficient. In Fig. 1, reference numeral 10 denotes the reflection coefficient (Γ_{in}) when the input-side matching circuit is viewed from the direction of the transistor 1. In general, the voltage $V(z)$ in the z-
